Instructions

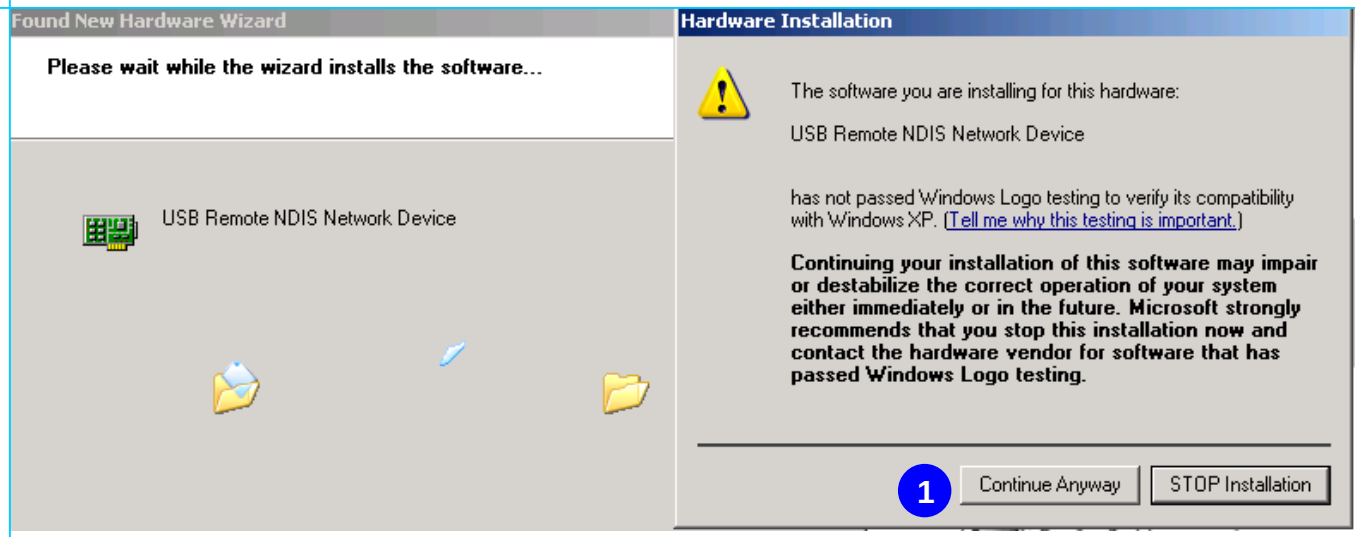
In the *Found New Hardware* Wizard, complete the following step:

1 If the Hardware Installation screen appears click on Continue Anyway.

Note: If the Hardware installation screen does not appear proceed to the next page of this user guide.



Found New Hardware Wizard
Please wait while the wizard installs the software...
USB Remote NDIS Network Device
Hardware Installation
The software you are installing for this hardware:
USB Remote NDIS Network Device
has not passed Windows Logo testing to verify its compatibility with Windows XP. (Tell me why this testing is important.)
Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft strongly recommends that you stop this installation now and contact the hardware vendor for software that has passed Windows Logo testing.
